

Hydraulic Powered Ring-lock, Netting and Wire Winder

Our **"Fence Master"** fence winder greatly increases the speed of the process in rolling up temporary or used fencing. No more sore backs, sliced fingers, scratched arms or uneven rolls rolling by hand. You can roll up to 250 metres or more, up to 350 Kg's of fencing in just a few minutes in a small package for easy re-use or disposal.

The **"Fence Master"** light weight design enables you to use small farm front end loaders and skid steers. The hydraulic controls, for winding is provided by the auxiliary hydraulic control of your current machine. The winder has minimal components and is, easy to use, easy maintenance and comes with a **1 year warranty**

Our hydraulic powered fence winder is a barrel type roller designed to wind up netting, hinged joint and ring-lock based fences and plain and barbed wire fences or all at once. You can clear an old fence by simply removing the fence posts from the ground and laying the old fence horizontal on the ground. Connect the fence wire to the shaft hooks and start winding

All fence posts and debris can be rolled up with the mesh, all loose wire and barbed wire is simply moved into the centre of the mesh and wound up with the ring-lock decreasing the time to remove the old fence and effecting a neat and tidy package for recycling

Once the fence is rolled up, the **Fence Master** is lowered to the ground, the steel centre shaft is slide out and a nicely rolled up fence is removed for re-use or disposal. Its simple design makes it easy to remove and store fencing materials

“Quick and efficient, Saves time and money!”

In Short

- Lightweight designed as a fork mounted winder for a skid steer loader, bobcat, tractor front end loader or could be adapted to a 3-point tractor linkage.
- Heavy duty built, designed to handle all types of fence can even pull netting out of the ground and also can wind up the pickets and posts along with the fence
- The finished rolls slide easily off the guides to allow quick turnaround when pulling fencing.
- If the fencing is broken, tie the next fencing to the roll and continue rolling
- Roll a perfect roll every time making it appealing for resale or easy compact disposal
- Handles up to 1800 mm in width with variable settings
- Roll speed can be adjusts as bundle increases.
- Assist property owners or contractors in clearing property of old fence and rolling used fence for re-use.
- Reduces labour and time to wind up,
- Makes used fence easily reusable, cleans-up the environment and clears area for a new fence.

“Makes it appealing for resale, easy storage and or disposal”
