

ALCARO

INDUSTRIES

CAPABILITY STATEMENT

What We Do:

Hydraulics/Pneumatics

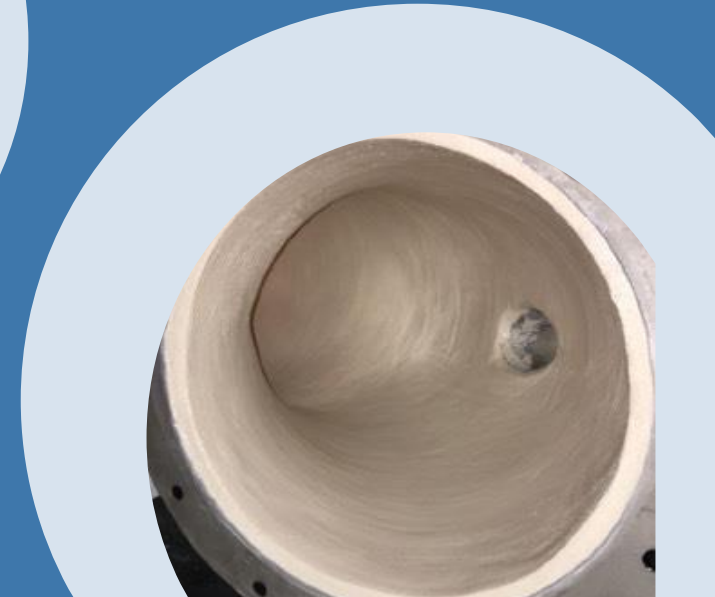

We specialise in complete system designs, equipment repairs, diagnostics, installations and preventative maintenance and offer customised solutions for unique applications and projects

Motion Control

Custom built to buy or units for hire, our quality construction to mine site standards, guarantees you superior function & reliability

Wear Lining

Our environmentally friendly Epoxy Resin products get you back up and running quickly and for longer

Who are we:

Servicing the Mining, Industrial & Agriculture sectors for over 20 years

A WA owned and operated business, Alcaro Industries specialises in mining, agricultural and industrial hydraulics and engineering with a workshop in Bullsbrook, as well as the capability to provide fully equipped mobile services.

Whether you're looking for special purpose machine designs and rebuilds or belt winder purchase or hire, we've got you covered.

We recently expanded our services to become the Australasian Agent for BULWARK™ Epoxy Resin Systems

Alcaro Hydraulic Services

A complex and intricate field, hydraulics and pneumatics require the expert knowledge. At Alcaro Hydraulic Services, we pride ourselves on delivering customised effective solutions to boost productivity and limit downtime.

Our mobile services are centred on meeting your needs on-demand. Gaining an in-depth understanding of your project requirements and applications, our team of technicians and engineers offer mobile solutions to enhance and restore productivity

Our expertise covers:

- Mobile onsite hose repair
- Cylinder repair
- Machine diagnostics, troubleshooting and failure analysis
- Special purpose machine design
- Hydraulic design and build
- Annual servicing
- Machine shop facilities (turning, milling and drilling)
- Manufacture and fabrication
- Parts sourcing
- CNC tube bending
- Hydraulic installations
- Emergency and fast response projects

Alcaro Motion Control

Providing the mining industries with a range of belt winders for removal and reinstallation of conveyor belts. These machines are ideal for locations where conveyor belts are in regular, heavy usage and quality, reliable machinery is needed to efficiently switch out belts and maintain productivity. Whether Custom made for your business or hiring from our standard range, Alcaro Motion Control has you covered.

Our winders are provided in an array of sizes, weights and torques, so you can select the configuration that most appropriately suits your project needs

Alcaro Wear Linings

We were recently appointed as the Australasian Agent/ Authorised Distributor and Applicator for **BULWARK™** Epoxy Resin Systems range which are environmentally friendly and designed to withstand corrosive and frictional wear.

- Our two part composites harden exothermically so that your industrial equipment is back operating with minimum down-time
